future

Liquidity Marketing
Reflections

Tokenomics: Holders

Miscellaneous

Mint function

This contract doesn't contain a mint function

Ownership function

This contract contains an ownership function, but
the ownership is not yet renounced

Verified source-code

The contract source-code was successfully verified
on bscscan.

This is important because this whole audit is based
on the code supplied there

Other safety threads or code errors

A thorough investigation has shown no major
unintended smart contract misbehaviour

Liquidity distribution

No liquidity is supplied yet

Website contains only correct information

All information about the smart contract seems to be
correct at this time

Dynamic variables that can be changed by the owner

Fee adjustments

The owner can set the fee up to 100%
This can be changed by renouncing the ownership
